

NotaryCam, First Company to Provide Online e-Closings On Demand, Set to Showcase at Upcoming MBA National Technology Mortgage Banking Conference & Expo

Solves e-Mortgage ‘Last Mile’ Friction; From Docs to Close in Less Than 60 Minutes – Anytime and from Anywhere in the World

In today's on demand economy, technology is revolutionizing industry after industry. It's no surprise that the mortgage industry has been in the cross hairs of innovation. NotaryCam offers the first and only patented software platform that takes any lender and borrower towards a 100% [online on demand e-Closing](#) – anytime and from anywhere in the world. Consumers have been clamoring for this option, and customer-oriented lenders are listening.

“We’re proud to announce that we have successfully completed secure, compliant and online mortgage e-Closings from all over the globe and are excited to offer a platform and vendor agnostic, robust ‘plug and play’ solution so that any lender or closing agent can easily close on demand – anytime and from anywhere in the world,” stated Rick Triola, NotaryCam’s Founder and CEO.

NotaryCam was selected for the National Association of Realtors/[Second City Ventures REach Class of 2015](#), as one of the most innovative companies in the real estate industry, drastically improving the overall experience for all parties, including the agent and their buyers and sellers.

“Our seasoned team of real estate/mortgage experts understood that, since 100% of all closings today require borrowers having to appear physically in person, this experience was antiquated, inconvenient and a waste of valuable time and resources – an obvious target for disruption. With a deliberate focus on the needs of the mortgage industry, we cracked the code around the ‘last mile,’ removing all of the associated friction, while reducing costs and providing the nation’s highest level of identity proofing and authentication. We’re simply accelerating the inevitable,” Triola continued.

NotaryCam will be showcasing its solution in Los Angeles at the MBA National Technology Mortgage Banking Conference & Expo, April 3 to 6, Booth 104, and during the Tech Showcase, April 5, at 9:15 a.m. in the Diamond Ballroom. For further information, visit www.notarycam.com.

About NotaryCam

NotaryCam is the innovation leader in online notary services that are valid in all 50 states. NotaryCam is the first and only company to securely and legally notarize documents for over tens of thousands of satisfied customers across the Globe. NotaryCam services are available on-demand, online anytime and from anywhere, through a professionally trained network of certified e-notaries. Requiring just a standard webcam, NotaryCam enables certified e-notaries to produce a digital version of notarized documents within minutes, making it the solution of choice for military personnel, lawyers, health care and mortgage industry professionals, Americans traveling abroad and anyone wishing to streamline the archaic process of notarization. With intensive third-party verification tools and the ability to maintain document integrity with tamper sealing and a video record of all transactions stored for a minimum of five years, the NotaryCam platform has been praised by law enforcement and government agencies across the U.S. for fraud prevention and ID verification and authentication.
